

# Polyfil®

*Polyfil® is a combination of high quality polymerized asphalt emulsion with select crushed and angular aggregates to cost effectively seal and repair a variety of asphalt and concrete pavement distresses.*

## Features

- Excellent ductility in cold temperatures
- Self healing properties in warm temperatures
- Superior tensile strength yields long service life
- Quick setting characteristics allows immediate use by traffic

## Benefits

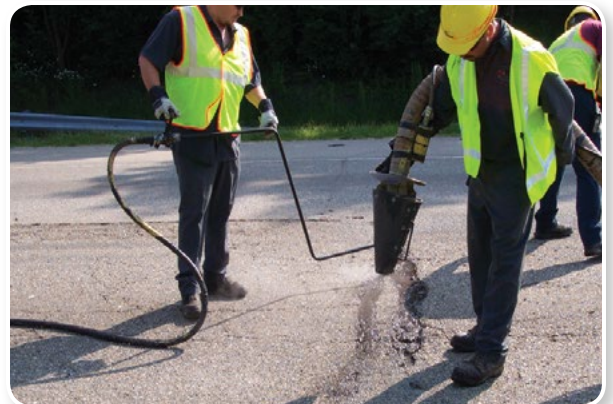

- Quick and compact operation minimizes traffic delays
- Consistent quality application with high production
- Extends overall pavement service life
- Economical repair compared to traditional methodologies

## Applications

- Highways
- Streets and Roadways
- State and Metro Parks
- Airport Runways and Taxiways
- Parking Lots
- Asphalt and Concrete Pavements

## Common Uses

- Alligator cracking
- Cold seam ravels
- Potholes
- Partial depth repairs
- Spalled concrete joints
