

# CAPE SEAL

Cape Seal is a widely used pavement maintenance tool which incorporates Chip Seal covered with Micro Surfacing. Cape Seal is an economical solution for addressing fair to moderately cracked pavements, while also providing a smooth, dense surface, good skid resistance, and a long service life.

## Benefits & Features

- Addresses pavements that exhibit extensive surface cracking
- Smooth texture with no loose aggregate
- Appearance of conventional asphalt but at a lower cost
- Excellent skid resistance over life of pavement
- No milling or casting adjustments required
- Economical alternative to 1 ½ inch asphalt overlay

Before

Micro Surfacing

Chip Seal

## Applications

- County Roads
- Township Roads
- City Streets
- Village Streets
- State and Metro Parks
- DOT Highways
